

FOUNDING PARTNER BRIEF

THE DAILY HOME FOR ISRAELI SPORT

English reporting. Scores. History. Community.

A professional English-language newsroom and daily sports habit—built in Israel for supporters everywhere.

12-MONTH LAUNCH • JULY 2026

Israeli sport is global. Its English daily layer is not.

The gap is not another translation feed. It is a trusted product that connects reporting, scores, history and community.

01

Daily relevance

Football, basketball and Olympic sport move throughout the day—not once per news cycle.

02

Diaspora access

Supporters outside Israel need accurate names, context and terminology in natural English.

03

Utility + journalism

Scores, tables and line-ups create habit; verified reporting creates trust.

04

Partner-safe context

A governed sports environment with measurable inventory and no editorial pay-to-play.

ILSP proposition

Fast enough for the match. Serious enough for the story.

Distance from Israel turned a gap into a mission.

Patrick Vanden Broek is building the English sports home he searched for as an Israeli growing up in Belgium.

01

Tel Aviv, 1973

Born to an Israeli mother and Belgian father, Patrick's connection to Israel began as family, identity and home.

02

Belgium, 1982

Moving countries changed the distance, not the bond. Culture, food, mentality and sport kept Israel close.

03

The gap grew

Barda, Itzhaki, Refaelov and other Israelis in Belgian football created interest without enough English context.

04

Now: build it

A decade-old idea becomes a daily newsroom and community for Israelis, Jews and every curious supporter.

Founder commitment

Passion starts it. Funding gives the newsroom people and time to last.

The product exists today—not as a pitch-deck promise.

A responsive local publication already combines dynamic headlines, fixtures, exact imagery and long-form reporting.

77 audit-clean published reports

Volume is discovered. Trust is earned at the gate.

ONE and Sport5 lead source discovery by configured volume; every report still needs independent, claim-specific verification.

Latest discovery mix

8 candidates discovered. Zero auto-published: the review gate held when final verification was unavailable.

Four controls separate ILSP from a content farm.

The commercial model depends on a publication that supporters, rights holders and partners can safely share.

VERIFIED

Claim-specific research

Material identities, scores, contracts and competition facts are checked against current authoritative records.

ORIGINAL

Professional English reporting

Substantial stories use natural sports terminology and clearly distinguish confirmed fact from uncertainty.

EXACT

Rights-cleared action imagery

No unrelated historical substitute; every public image must match the stated athlete, team, venue or event.

ACCOUNTABLE

Corrections and audit trail

Homepage promotions, timestamps, duplicates and public-facing professionalism are reviewed every cycle.

Commercial support never buys coverage, rankings, facts or corrections.

Scores turn reporting into a daily habit.

Schedules, results, team marks and completed tables are connected. Licensed live events and deeper statistics are the funded next step—and the largest data dependency.

CONNECTED NOW

Fixtures • recent results • league tables
• team marks • competition filters

FUNDED NEXT

Two-minute live scores
Starting line-ups
Goalscorers + incidents
Player and match statistics
Broad Israeli multi-sport depth

One newsroom. Five reasons to return every day.

The website is the source of truth; each channel turns verified reporting into a repeatable supporter habit.

Match and story return

What does the partner actually gain?

A partner receives a defined audience product, measurable outcomes and category protection—not vague logo exposure.

01 Visible relevance

Presence on the selected ILSP product, launch moments and approved campaign surfaces.

02 Audience access

A credible route into English-speaking supporters of Israeli sport in Israel and worldwide.

03 Measured proof

Monthly delivery reporting and a quarterly impact review covering reach, usage and engagement.

04 Purpose + trust

Association with independent sport, diaspora connection and under-covered teams and athletes.

Founding advantage

Early category position, launch association and a first renewal conversation—without editorial influence.

Before audited traffic exists, ILSP sells a defined pilot and a baseline—not invented impressions or guaranteed reach.

Hundreds in the universe. Every approach remains personal.

The deck is a general foundation; each prospect receives a short, target-specific opening, relevant ask and approved attachment.

Operating cadence

25 personalised openings per month
Two useful follow-ups at most
CRM record, verified route and owner approval
Close the sequence when there is no fit

Planning funnel—not a promise

The ranges are workload and conversion assumptions. They become forecasts only after real reply, meeting and proposal data exists.

Five sponsor products—not five prospects.

Hundreds of organisations can receive a tailored proposal. Pricing remains illustrative until traffic, legal review and founder approval.

FOUNDING	MATCH CENTRE	DAILY PULSE	ARCHIVE	WOMEN + YOUTH
\$30k	\$20k	\$12k	\$10k	\$12k
Launch association + quarterly impact	High-intent utility + usage reporting	Newsletter presence + campaign reporting	Heritage positioning + monthly reach	Under-covered sport + impact reporting

Every package includes

Clear deliverables • category protection • brand-safety controls • performance reporting • editorial firewall

No reader data sharing. No control over coverage. No unapproved discounts or promises.

The professional 12-month launch target: \$213,790.

A conservative founder-led model—not a fully staffed corporate newsroom. Public technology prices are verified; payroll, rights and data still require local quotes.

\$213,790

12-month cash target

\$14,465

monthly operating run rate

\$17,304

one-time launch work

\$22,906

contingency reserve

\$30,000

indicative in-kind target

Recommended gate: one founding cash partner + one infrastructure/data partner before production purchases.

MODEL STATUS: math reconciles • public platform fees checked • employment, media and production-data costs remain estimates

Fund the proof. Validate the habit. Scale only on evidence.

Each phase has a release gate; apps and multilingual expansion follow a stable English newsroom and licensed data foundation.

No app-store account, production deployment, data contract or external campaign is activated before the matching approval and funding gate.

FOUNDING CONVERSATION

Help build the daily home of Israeli sport in English.

We are seeking:

- 01 A founding cash partner
- 02 A licensed data or infrastructure partner
- 03 Mission-aligned distribution and grant partners
